

Seafront Consultation Results

Background

The seafront consultation ran from 1st August and ran for a month. The consultation aimed to find out from local residents how they viewed the current facilities and services located on the seafront and if they had any ideas or views on certain things such as appearance and cleanliness.

Questionnaires were distributed to approx. 900 seafront residents, while the consultation was available to complete online and publicised at various locations throughout the city (Libraries, museums, council buildings)

In total 1,129 people responded and participated in this consultation. The levels of response indicate the popularity and also the importance of the seafront area to local people.
