Hi Mike

I have got in touch with Steph on behalf of Mr Miah and he has agreed to add a condition to the operating schedule that there shall be no admission or re-admission after 01:00 hours. Rocky will include this in his report and this will be added as a condition on the licence.

**Subject:** FW: Meeting next week at 80-82 Osborne Road PO5 3LU - Environmental Health/Kassia Southsea

Hi Deb,

Sorry, I've got another question.

Please see emails below with the applicant. In the email from Steph dated 23<sup>rd</sup> September, they agreed with a policy of no re-admittance after 01:00. Provided it's relevant i.e. they keep the same or similar hours to the ones they have applied for and more stringent re-admittance times are not agreed, can this be adopted as a condition?

Thanks, Mike

Hi Steph,

Thank you for your email.

As I explained to Mr Miah, the design and the elements for the design that are chosen are dependent on what levels of noise you are planning to create within the premises. Just to be clear, the design must be aimed at **airborne noise** rather than impact noise. It is likely that the ceiling solution will be an independent hanging ceiling.

I'm not an expert in sound insulation works but there are basic principles in sound insulation. The first principle is that the heavier the elements are, the better the insulation will be - this can often, for example, result in 2 or 3 layers of acoustic board. I would also expect to see additional sound absorbing materials such as rockwool / isowool etc that would be inserted into the cavity.

I can't recommend a specific design or products as I must remain impartial. Have a look at a few web sites and **aim high** with the level of Rw (or Rw+ctr if you think your music offer may have a bassy element to it) - remember that you will at times be producing quite a lot of noise and so you want to ensure that the design solution will protect the neighbours living above and protect you from complaints. **You may wish to consult with an acoustic consultant as they will be best placed to recommend a solution.**

Hi Michael,

We are happy to implement a policy of no re-admittance after 01:00.

In regards to your request for insulation specifications, our builder is more than happy to provide such information. He is currently in the design phase, with a number of options for us. To assist us in choosing the appropriate design, would you be able to suggest an acceptable decibel level for the insulation to protect against? I realise that this should be as high as possible, but any advice you can offer will assist us in ensuring we are looking at the right products. We will also consider the fire rating and weight of the insulation.

The overall design of the building will reflect that of our business in Drayton, heavily soft furnished. In addition to the treatment of the walls and pillars, this will contribute significantly to any flanking

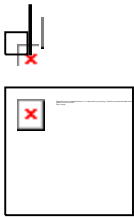

transmission. We have commissioned our carpet installer to limit hard flooring to narrow walkways only - all other flooring in the front of house area will be soft carpet.

Hi Steph,

Thank you for the emails. I met with Mr Miah tonight and we discussed plans for entertainment and sound insulation for the premises. We also discussed my reservations about the plans, in particular the late night opening and music offer.

Mr Miah has advised that the approach to sound insulation will be over and above what is strictly necessary - i.e. a level of sound insulation that will be good for levels of noise above that which will be created inside the premises. Mr Miah is to submit to me a scheme of works, including treatment of the walls (and pillars) to restrict flanking transmission by close of business Friday.

I would also like consideration made of noise from people gathering outside of the premises, such as smokers etc. One measure that I strongly recommend consideration of is a policy of no re-admittance after 01:00, for example.

Dear Mr Thorne,

Further to our call earlier today, we would be pleased to meet with you next week to show you the premises and our plans for the refurbishment.

Our company director, Kaz Miah will arrange to be at the site at 6.30pm on Tuesday 20th September.

My contact details are below, and Mr Miah's telephone number is [REDACTED] [REDACTED] should you need to get in touch.
