

Equality Impact Assessment

Preliminary assessment form v5 / 2013

www.portsmouth.gov.uk

The preliminary impact assessment is a quick and easy screening process. It should:

- identify those policies, projects, services, functions or strategies which require a full EIA by looking at:
 - negative, positive or no impact on any of the equality groups
 - opportunity to promote equality for the equality groups
 - data / feedback
- prioritise if and when a full EIA should be completed
- justify reasons for why a full EIA is not going to be completed

Title of policy, service, function, project or strategy (new or old) :

Substance Misuse - Drug and Alcohol Testing Policy (Port)

Type of policy, service, function, project or strategy:

- Existing
- New / proposed
- Changed

Q1 - What is the aim of your policy, service, function, project or strategy?

The aim is to introduce a drug and alcohol testing policy at Portsmouth International Port for all employees and third parties in all roles working on the Port premises due to the safety critical nature of the work undertaken at the Port. The policy provides information regarding the rules and the procedure for testing.

Employees and third parties (as defined in the policy) at the Port:

- Must not consume alcohol or have the smell of alcohol on their breath while on duty.
- Must not present themselves for duty under the influence of alcohol.
- Must comply with the Port's zero tolerance approach to illegal drugs. Any use, possession or trafficking of illegal drugs and the misuse, whether intentional or not, of prescription or over the counter medication, new psychoactive substances, glue and solvent abuse is prohibited while on duty. All civil and criminal legislations apply to City Council policy.
- Must undertake a breath test for alcohol and/or an oral fluid (mouth swab) for drugs when requested.

Any breach of these rules will result in the application of the City Councils Formal Action Policy which could lead to summary dismissal.

Q2 - Who is this policy, service, function, project or strategy going to benefit or have a detrimental effect on and how?

The policy applies to all Portsmouth City Council (PCC) employees working at the Port. It also applies to third parties working on the Port premises, namely, contractors, consultants, agency staff and individuals participating in a secondment, internship, or work experience placement.

The implementation of this policy will benefit all employees and third parties at the Port by making the workplace safer. The new measures actively encourage individuals to manage their lives in such a way that safety at work is not jeopardised.

In order to effectively implement this policy, the City Council will contract an external testing company to perform the tests under appropriately controlled conditions and in accordance with industry standards.

Privacy and confidentiality

No practical difficulties have been identified as the chosen types of testing procedure are less invasive than other types of testing available. The policy states that a "suitable location" will be chosen for testing - this will ensure privacy for staff and confidentiality.

No data protection issues have been raised from the use of an external company for testing. The selection will be made at random by the testing company representative using an anonymised list of employees and third parties.

Dependency/addiction/medical issues

Those with a drug or alcohol dependency are provided with the opportunity to voluntarily disclose this information.

Anyone taking prescribed or over the counter medication are requested via the policy to check with their medical practitioner or pharmacist whether the medication will impair performance, conduct or attendance (e.g. cause severe drowsiness, impair reflexes or judgment) and/or affect their capacity to safely and effectively undertake the duties of their post. The policy states that they must inform their line manager and always follow the prescribed dose carefully.

This part of the policy helps ensure that anyone taking medication are given the opportunity to raise it with their line manager.

The implementation period will contain a 30 day amnesty where an employee can disclose information prior to any testing being introduced.

Q6 - Using the assessments in questions 3, 4 and 5 should a full assessment be carried out on this policy, service, function or strategy?

yes No

Q7 - How have you come to this decision?

Initial consultation took place in July with union representatives at the Port. The issue was discussed at

the HR/TU meeting in July 2017. Full consultation took place during August 2017 and included representatives from all recognised unions across the council.

Feedback has been received and changes to the policy implemented where necessary. During the consultation the trade unions have raised a number of points, including requesting how supervisors/managers will be trained to differentiate between behaviour attributed to substance/alcohol misuse or behaviour attributed to the many other possible causes illness/disability.

To resolve this issues it has been agreed that trade unions may attend initial training with the chosen testing company.

The trade unions have raised that the employer is not qualified to dictate what course of treatment an employee may choose. The trade unions have been informed that the policy is not suggested that the employer dictates to the employee on their course of medical action/support/advice as this would not be appropriate action by the employer. However, it is stating that formal action may be considered if an employer is aware that a set course of action or contact with relevant agencies is not undertaken where conduct continues at an unsatisfactory level.
