

Agenda Item 15d

Ordinary Council Meeting of: 12 December 2023
Cllr Ashmore/Cllr Pitt

AGENDA ITEM 15d - Recycling of Domestic Waste

Amendment:

To delete paragraph four and replace with:

Therefore, Council acknowledges that the Cabinet Member for Environmental Services is already developing a plan that will including specific measures, and an estimated timescale, to increase the rate of recycling of household waste collected in Portsmouth. However, the Council also acknowledges that some of the timescales and plans already considered and developed by the cabinet member may need to be modified once the Government has set clear outlines for its 'Simpler Recycling' plan for local authorities. Any consideration this Council or any other local council in Hampshire makes will also need to be discussed at the Project Integra board where we work in partnership with other local authorities across Hampshire to all manage our waste, increase recycling and invest in large scale financial waste projects together.

Proposed by Councillor Dave Ashmore
