

Equality Impact Assessment

Preliminary assessment form v5 / 2013

www.portsmouth.gov.uk

The preliminary impact assessment is a quick and easy screening process. It should:

- identify those policies, projects, services, functions or strategies which require a full EIA by looking at:
 - negative, positive or no impact on any of the equality groups
 - opportunity to promote equality for the equality groups
 - data / feedback
- prioritise if and when a full EIA should be completed
- justify reasons for why a full EIA is not going to be completed

Directorate:

Director of Regulatory Services and Community Safety

**Function e.g. HR,
IS, carers:**

Environmental Health

Title of policy, service, function, project or strategy (new or old) :

Assessment of air quality

Type of policy, service, function, project or strategy:

- Existing
- New / proposed
- Changed

Q1 - What is the aim of your policy, service, function, project or strategy?

The aim of the policy is to report upon the:

- review and assessment of air quality in Portsmouth and the publication of the 2016 air quality progress report
- changes implemented by Department of Environment Food and Rural Affairs (DEFRA) to the annual reporting of air quality and the governments expectations of local authorities in relation to improving air quality
- need to continue to explore options and strategies in order to improve air quality in Portsmouth
- installation and requirement for a new DEFRA coordinated air quality monitoring in Portsmouth

Q2 - Who is this policy, service, function, project or strategy going to benefit or have a detrimental effect on and how?

Benefits: Positive health impacts for all. It is recognised that poor air quality is a contributing factor in the onset of heart disease and cancer. Air pollution particularly affects the most vulnerable in society: children and older people and those with heart and lung conditions.

Detrimental impacts: Any consideration of implementing clean air zones in Portsmouth must be carefully deliberated and assessed. A cost-effectiveness approach to evaluate zone proposals would be required to assess the effects of introducing such a scheme (valuation of the benefits - the amount of pollution reduction achieved and associated health benefits for the cost of doing so together with a comparison of the economic efficiency of introducing zones as a way of reducing pollution against the economic efficiency of alternative measures).

Q3 - Thinking about each group below, does, or could the policy, service, function, project or strategy have a negative impact on members of the equality groups below?

Group	Negative	Positive / no impact	Unclear
Age	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Pregnancy and maternity	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Other excluded groups	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

If the answer is "no" or "unclear" consider doing a full EIA

Q6 - Using the assessments in questions 3, 4 and 5 should a full assessment be carried out on this policy, service, function or strategy?

yes No

Q7 - How have you come to this decision?

Improving air quality is positive in terms of protecting human health irrespective of equality group.

The government have produced numerous reports detailing these positive impacts and quantifying the benefits in terms of increased life expectancy and reduced costs (£) in terms of delivering health care.

As the data clearly demonstrates that improved air quality will be a benefit to all it is unnecessary to seek specific data in relation to impact upon any specific equality group.
