

Title of meeting: Cabinet Member for Traffic and Transportation
Date of meeting: 31 July 2018
Subject: Revised Residents' Parking Programme of Consultation
Report by: Tristan Samuels, Director of Regeneration
Wards affected: All
Key decision: No
Full Council decision: No

1. Purpose of report

- 1.1** The purpose of this report is to provide an update on the current Residents' Parking Programme of Consultation and, as requested by the Cabinet Member on behalf of the new Council administration, to provide a revised Programme of Consultations to take place in areas where residents have requested a residents' parking zone (RPZ).

Appendix A: RPZ Programme of Consultation plan (page 11)

2. Recommendations

It is recommended that:

- 2.1** the progress on the previously approved Residents' Parking Programme is noted (Sept 2015 - June 2018);
- 2.2** the revised Programme of Consultations with local residents, as set out in this report, is confirmed and consultation on each area listed is progressed.

3. Background

- 3.1** Following a change in Council administration in May 2018, a revised Residents' Parking Programme of Consultation was requested, reflecting the new administration's priorities.
- 3.2** This new Programme of Consultation supersedes the previous approaches and Traffic & Transportation decisions relating to the Residents' Parking Programme, making key changes to the 2015 consultation programme.

4. Consultation

4.1 If residents report issues with displacement parking from Residents' Parking Zones, they will be surveyed promptly to understand those issues.

4.2.1 As evidenced in this report, those areas that have already been surveyed and/or taken part in formal consultation by the Council at least twice within the past 5 years will not be subject to a further informal survey. The public will be fully consulted under the statutory consultation requirements of a traffic regulation order, with information on Residents' Parking being delivered to each household just ahead of the statutory 21-day consultation period. This will expedite the published process set out below:

Stage 1: Informal survey	Gathers information from residents about parking problems, and determines whether or not to proceed to Stage 2
Stage 2: Formal statutory consultation via a traffic regulation order	Public consultation takes place on a proposed parking zone. Recommendations are made based on how residents respond
Stage 3: Decision by Cabinet Member	The response to the proposed parking zone is considered at a public decision meeting

4.2.2 It is very important that everyone living and working in an area responds to the informal survey and any subsequent formal proposals that go forward. The Council will make decisions based on feedback: if people do not engage then their views cannot be considered or assumed.

4.3 The Programme includes two areas of Southsea where parking zones were removed in 2015 (former MB and MC parking zones) as first priority locations for consultation. Ward councillors reported a desire from residents for Residents' Parking to be reinstated. Following feedback from residents of Jubilee Rd, Bath Rd and other roads east of Francis Avenue, an extension will be made to the MB and MC zone boundaries, (so that roads are not split in half.)

4.4 The area of Baffins/Copnor east of Copnor Road between Copnor Bridge and Burrfields Road (HC) is restored to the Residents' Parking Programme at the request of Baffins ward councillors; the area having appeared on a previous Programme of consultation that was discontinued in 2012.

4.5 The 2017 review of KC West Southsea is to be revisited following concerns regarding non-implementation of the original proposal and the support for it. Concerns have been directed to the Council administration and officers.

4.6 A progress update report will be brought to Traffic & Transportation following completion of consultation on the potential MD North Kings area parking zone, confirming the next priorities in the Residents' Parking Programme.

4.7 This report does not determine where new parking zones will be implemented or how existing zones will be amended: each area will be subject to its own consultation. A subsequent report to the Cabinet Member for Traffic and Transportation will be required following each consultation.

4.9 There have been requests from local ward councillors and residents for consultation on Residents' Parking in the following wards: Charles Dickens, Copnor, Cosham, Eastney & Craneswater, Fratton, Hilsea, Milton, Nelson and Paulsgrove. These consultations will be progressed when resources allow.

5. Reasons for recommendations

5.1 Parking continues to be a key concern throughout Portsmouth. Publishing the Residents' Parking Programme gives residents a main point of reference, and helps to manage residents' expectations by outlining the progress to be made.

5.2 New parking zones and the review of existing parking zones are set out within the Programme in section 4, taking into account:

- (i) the new Council administration's priorities;
- (ii) available resources and funding;
- (iii) requests recorded from residents directly or via their ward councillors;
- (iv) mitigating measures against parking displacement (i.e. where recorded interest in permit parking is currently minimal, but the previous impact of Residents' Parking Zones has been significant on adjacent areas);
- (v) feedback and petitions from residents of existing parking zones, requesting changes.

6. Equality impact assessment

6.1 An EIA is not required at this stage as the report does not put forward any proposals and therefore the recommendations do not have a disproportionate negative impact on any of the specific protected characteristics as described in the Equality Act 2010. Each subsequent new proposal will be subject to public consultation and a separate report that assesses any impact on the Equalities Groups.

7. Legal implications

7.1 As the recommendations do not propose any further action at this stage there are no legal implications. Any alterations or additions to the existing traffic regulations orders will require approval in the usual way.

8. Director of Finance's comments

8.1 The financial implications of approving this revised programme are currently unknown. However more detail about the financial impact of the programme will be known as the extent, operation and impact of the individual Parking Zone schemes becomes clearer.

8.2 Each individual scheme will be introduced under a Traffic Regulation Order which will be required to be approved at the Traffic and Transport Portfolio decision meeting. A financial appraisal detailing the financial impact of the scheme will be presented with each report, before the scheme is implemented.

8.3 Any additional costs as a result of introducing these schemes will be met from the On Street Budget and any income generated will be remitted back to the Off Street Parking Reserve. Whilst this has no effect on the City Council's Cash Limited budget it will affect the amount of money remitted to the reserve.
