**Title of meeting:** Health and Wellbeing Board

**Subject:** Responding to Climate Change

**Date of meeting:** 25<sup>th</sup> September 2019

**Report by:** Corporate Performance Manager

**Wards affected:** All

---

**1. Requested by**

Cllr Winnington, Cabinet Member for Health, Wellbeing and Social Care

**2. Purpose**

2.1 To update the Health and Wellbeing Board on actions being taken by Portsmouth City Council in response to the Notice of Motion adopted on 19<sup>th</sup> March 2019, to declare a climate emergency in Portsmouth.

**3. Background**

3.1 On 19<sup>th</sup> March, the Council adopted a Notice of Motion, "Proposal to Declare a Climate Emergency in Portsmouth." This resolution included 7 asks of the Cabinet:

- Declare a 'Climate Emergency' then ask partners to sign up, including local business, schools and community groups
- Pledge to achieve net zero carbon emissions in Portsmouth by 2030, considering both production and consumption of emissions according to the Standard provided by the Greenhouse Gas Protocol.
- Require the Leader of the Council to report back to the Council within six months with an action plan, detailing how the Council will work with partners across the city and with central government to ensure that Portsmouth's net carbon emissions (Scope 1, Scope 2 and Scope 3 emissions as defined by the GHG Protocol) are reduced to zero by 2030
- Provide an annual report on Portsmouth GHG emissions, what is working and what is more challenging and progress towards achieving net zero-carbon emissions
- Require the Chief Executive to establish a "Portsmouth Climate Change Board" before the end of July 2019, equivalent to that of Manchester, to underpin our efforts to decarbonise Portsmouth.
- Write to the government requesting a) additional powers and funding to make the 2030 target possible, and b) that ministers work with local government and other governments to ensure that the UK maximises carbon reduction by

**Finance Comments as no decision is being taken)**

2030 in line with the overriding need to limit global warming to a maximum of 1.5°C.

- Develop and implement a community engagement plan to i) fully inform residents about the need for urgent action on climate change ii) offer a vision of a healthier, more child friendly and greener city that is a model of best practice iii) mobilise residents in the delivery of the action plan.

3.2 These actions amount to a significant programme of work, and a plan to deliver these has been developed.

#### **4. Implementing the requirements of the Notice of Motion**

4.1 The Notice of Motion is clear that there are two levels of response on this issue - the wider city and partners piece; and the response of Portsmouth City Council as an organisation. In order to implement the requirements of the Notice of Motion, the following actions will be undertaken:

- Significant partners in the city are being asked to sign-up to the Climate Emergency declaration
- Previous work undertaken on the organisation's carbon reduction plan will be refreshed to ensure that this is aspirational, realistic and covers the full breadth of PCC's activity, including the operational footprint (for example, staffing, waste, administrative buildings), housing and commercial stock, and policies (such as planning and procurement). The Carbon Reduction plan has not been actively monitored since 2015, so the refresh will be timely and the plan should be presented for adoption by the Cabinet in autumn 2019.
- Ensure that the refreshed carbon reduction plan includes specific, measureable, achievable, realistic and timely targets, which can be monitored regularly and reported on an annual basis - it is important to recognise that lots of work is happening, or has happened, that can be the building blocks of the plan (for example, work on clean air, single-use plastics, waste stream reduction, vehicle fleet improvements, home energy efficiency).
- Use the process of refreshing the plan to identify asks, in terms of additional powers and specific funding, that will be pursued with ministers and with other organisations
- Alongside the development of the organisation's Carbon Reduction Plan, facilitate the development of a Portsmouth Climate Change Board in support of this work, with a specific role to develop community engagement.

4.2 The Portsmouth Climate Change Board will not be a decision-making body of the local authority, but will instead have a role to promote issues relating to climate change in the city, lobby and raise awareness, and provide a forum for issues relating to climate change on a city wide basis to be shared, discussed and co-ordinated. It could be that the board can commission specific pieces of work to be undertaken on a "task and finish" basis by working groups. Such a Board would be cross organisational and non-political (in terms of leadership) with chairmanship to be held on a revolving basis across member organisations.

**(Please note that "Information Only" reports do not require Equality Impact Assessments, Legal or Finance Comments as no decision is being taken)**

4.3 The proposals recognise that much is already happening to support this priority, but that this activity is in need of co-ordination and promotion to ensure that the impact is optimised across the council and the city.

.....  
Signed by David Williams, Chief Executive, Portsmouth City Council
