Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

Project activities are diverse and designed to engage a range of audiences. As part of the development of staff and volunteers we have delivered equality and disability training (the latter attended by Gina P) and Welcome Host Gold. The D-Day Story has been particularly successful in terms of its offer for a range of audiences ie through the way the exhibition has been developed and through complementary programming. This approach will be continued as part of the LCT project.

How are you going to measure/check the impact of your proposal?
Through evaluation including with an external evaluator who will assess visitors' responses to the LCT offer.

B - Environment and climate change

Yes

No

Is your policy/proposal relevant to the following questions?

B1-Carbon emissions - Will it reduce carbon emissions?☐☒

In thinking about this question:

- How will it reduce greenhouse gas emissions?
- How will it provide renewable sources of energy?
- How will it reduce the need for motorised vehicle travel?
- How will it encourage and support residents to reduce carbon emissions?

If you want more information contact Tristan.thorn@portsmouthcc.gov.uk or go to:

<https://www.portsmouth.gov.uk/ext/documents-external/cmu-sustainability-strategy.pdf>

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

Based on the developments electrical demand being supplied by grid electricity the projects combined utilities carbon footprint will be 9.66 tonnes CO2 per year. Further information is contained within the Carbon Footprint Report for LCT project (June'18). Reducing carbon emissions is a requirement of the main funder of the LCT project - ie the National Lottery Heritage Fund. We will be encouraging people to travel to see LCT on foot, by bicycle and using public transport.

How are you going to measure/check the impact of your proposal?

TBC

B - Environment and climate change

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

Negative environmental impacts have been reduced through the specification of low energy consuming display and external lighting. The lighting is designed with smart control gear which will allow complete flexibility in the operation of the lighting systems. This will ensure that lighting is not left on during out of hours. In addition to energy performance the external lighting is designed in compliance with the ILP guidance document governing sky glow effect which will minimise disturbance to wildlife. All fittings will be LED with low maintenance requirements and long life. All available opportunities have been identified to minimise the negative environmental impacts through the specification of small power and electrical equipment.

How are you going to measure/check the impact of your proposal?

B - Environment and climate change

Yes

No

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

The development lies within Flood Risk Zone 3 as indicated on the Environment Agency flood map. On this basis the site is considered to be at a low risk of flooding. The flood mitigation considerations indicate that no increase in flood risk, either on site or downstream, has been introduced as a result of the development and no flood risk reduction measures are required. Further information is contained within the project Flood Risk Assessment (May'18).

How are you going to measure/check the impact of your proposal?

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

The new access to the D Day car park will be formed through a bellmouth arrangement and located approximately 105m west of the existing access. The segregation of the access points for vehicles and pedestrians will result in a betterment in the

existing conditions and reduce the likelihood for conflict at this point given that pedestrians and vehicles currently share a single point of access through an informal shared surface arrangement. Further information is contained within the LCT project Transport Statement (May'18).

How are you going to measure/check the impact of your proposal?

B - Environment and climate change

Yes

No

Is your policy/proposal relevant to the following questions?

B7-Waste management - Will it increase recycling and reduce the production of waste?

In thinking about this question:

- How will it reduce household waste and consumption?
- How will it increase recycling?
- How will it reduce industrial and construction waste?

If you want more information contact Steven.Russell@portsmouthcc.gov.uk or go to:

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

The project conserves an extremely large metal structure - the LCT. I suppose this could be viewed as a significant recycling project. Bricks removed to make the new entrance to the D-Day Car Park will be used to make repairs to other parts of the wall. Waste and recycling will be picked up as part of the operation of The D-Day Story (and should be modest).

How are you going to measure/check the impact of your proposal?

C - Regeneration of our city

Yes

No
