

Integrated Impact Assessment (IIA)

Integrated impact assessment (IIA) form December 2019

www.portsmouth.gov.uk

The integrated impact assessment is a quick and easy screening process. It should:

- identify those policies, projects, services, functions or strategies that could impact positively or negatively on the following areas:
 - Communities and safety
 - Regeneration and culture
 - Environment and public space
 - Equality & - Diversity This can be found in Section A5

Directorate:

Finance and Resources

Service, function:

Highways PFI

Title of policy, service, function, project or strategy (new or old) :

Portsmouth City Council Permit Scheme

Type of policy, service, function, project or strategy:

- ☐ Existing
- ☒ New / proposed
- ☐ Changed

What is the aim of your policy, service, function, project or strategy?

To implement a chargeable permit scheme for streetworks and roadworks in line with DfT advice. This will replace the current 'noticing' system.

Has any consultation been undertaken for this proposal? What were the outcomes of the consultations? Has anything changed because of the consultation? Did this inform your proposal?

The proposal was informed by DfT via a written letter to all authorities directing the change to permitting. An informal and formal consultation has taken place between February - June 2020 amongst key stakeholders within the industry. This included local authorities, utility companies and other relevant parties who are members of the regional HAUC (Highways Authority and Utilities Committee). Queries that were raised from the consultations have been either answered or considered in the final draft of the scheme. The scheme was based upon tried and tested schemes in surrounding authorities.

The majority of activities on the highway have potential to reduce the width of the street available to traffic, pedestrians and other users and also have the potential to inconvenience local businesses and residents. Activities where the traffic flow is close to, or exceeds the physical capacity will have the potential to cause congestion, disruption and delays. The introduction of a permit scheme allows for tighter controls and restrictions on works taking place. Works will be on the highway for shorter periods of time and at the least disruptive times of the day. This will be done through improving the planning, scheduling and management of highway activities.

The benefits of this are:

- reduced traffic build up on the network
- less idle vehicles and associated emissions
- increased and safer access to use of the highway by pedestrians and cycles

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

By reducing and restricting the time temporary works are on the highway, the more availability of the whole network is likely to be available to all forms of transport. The less signage, barriers and diversions on the road at one time improves safety and accessibility of the roads, cycle lanes and footways.

The permit scheme will provide more accurate and timely information to be communicated between stakeholders and all road users.
