Licensing applications must be rejected for the outdoor bar at the side of the Southsea Pier on the grounds of over development. The pier already has facilities for selling alcohol at the gaiety bar and new cocktail bar recently opened adjacent the Deep Blue Sea Fish and Chip outlet. Already masses of seating in the gaiety bar ballroom and also adjacent walkways around the whole pier. There is no justification for already over crowded use especially at weekends. Residents are fed up with anti social behaviour as a result of excess alcohol drinking which is not being policed at all. The seafront is slowly turning into a Blackpool of the south. We do not want Southsea seafront to be ruined by attracting obvious disruptive and excess noise as residents live directly adjacent and any future development is unwarranted. Hopefully we get a decision to refuse these applications. PS the Beach Bar just east of the pier has already been brought to task by Council Enforcement for abuse of licensing laws particularly with Covid 19 restrictions being flaughted. Enough is enough the Council own these properties it is the tenants who are only interested in many a quick fortune with no regard to adjoining residences.  
Thank you.
