It was noted from the consultation that some routes require attention as their condition may present an impediment to use by disabled persons. That said, the proposed approval to reconstitute the definitive map and statement is not considered to have an equality impact as it acknowledges existing routes rather than creating new routes or physically altering existing ones. Reconstitution of the Definitive Map and Statement should improve management of rights of way.

How are you going to measure/check the impact of your proposal?

As above, reconstitution of the Definitive Map and Statement should improve management of rights of way.

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

Aside from the possibility that active travel may be negligibly increased through awareness of footpaths by reconstitution of the Definitive Map and Statement, this is an administrative recognition of existing facts so no changes are anticipated 'on-the-ground'.
