The action plan should have a positive impact on female employees in putting measures into place to reduce the gender pay gap between men's and women's average earnings across the workforce. The makeup of the Council's workforce is that it is predominantly female.

Based on 31st March 2020 data set, there were 5,128 relevant full pay employees, which is made up by 3,671 females (72%) and 1,457 (28%) males. Out of the 5,128 relevant employees, 20 are covered by TUPE regulations (6 are male and 14 are female).

The profile of the workforce has been broken down into the proportion of full time and part time employees, whereby 1,086 (75%) of males are full time and 371 (25%) are part time compared to 1231 (34%) of females are full time and 2440 (66%) are part time.

Nationally the gender pay gap exists for a number of reasons, this may be due to time being taken out from the labour market for caring responsibilities or a larger proportion of females working in lower paid part time jobs.

How are you going to measure/check the impact of your proposal?

The gender pay gap is reviewed and reported on annually. This identifies any changes in the pay gap and where these changes are.
