

**AGENDA ITEM 12 (g) - HOUSING BUILDING TARGET**

Amendment.

To add the additional paragraph to the end of the motion:

We note the recent SOS correspondence, shared with us by the Leader of the council, in which the government has stated that any local authority which disagrees with the housing targets suggested by the standard formula, for example due to land supply or environmental constraints, should use their local plan development process to evidence this and propose an alternative local target. Council regrets the missed opportunity to put a reduced target and the reason for it in the Draft Local plan currently out for consultation and confirms that everything that can be done to ensure that the next version of the Local plan contains a fully justified reduced housing target.
