

# Integrated Impact Assessment (IIA)

Integrated impact assessment (IIA) form December 2019

[www.portsmouth.gov.uk](http://www.portsmouth.gov.uk)

The integrated impact assessment is a quick and easy screening process. It should:

- identify those policies, projects, services, functions or strategies that could impact positively or negatively on the following areas:
  - Communities and safety
  - Regeneration and culture
  - Environment and public space
  - Equality & - Diversity - This can be found in Section A5

**Directorate:**

Regeneration

**Service, function:**

Traffic & Network Management

**Title of policy, service, function, project or strategy (new or old) :**

Old Portsmouth Area Traffic Study

**Type of policy, service, function, project or strategy:**

- Existing
- New / proposed
- Changed

**What is the aim of your policy, service, function, project or strategy?**

The Old Portsmouth Area Traffic Study aimed to establish whether perceived traffic issues in the area were resulting in reduced quality of life for residents. Once established, possible solutions are suggested to combat any identified issues. The scheme does not seek to implement these solutions but

to gain acknowledgment and support in a public forum to progress future highway interventions.

Has any consultation been undertaken for this proposal? What were the outcomes of the consultations? Has anything changed because of the consultation? Did this inform your proposal?

The Study was carried out in conjunction with the Local Community groups with an interest in Traffic & Transport issues. These groups helped to define the scope of the study and have been involved throughout. Where findings are/were challenged e.g. accuracy of a survey result, the exercise was repeated to allay concerns. There was once occurrence of a challenge that could not be repeated due to time constraints, instead the report recommends a repeat of this part of the study as part of future work.

Much of the feedback received through the report is that older members of the community struggle to get around as a result of busy roads and a lack of adequate crossing facilities. The report has identified some potential improvements and recommends that these be progressed as improvement schemes

How are you going to measure/check the impact of your proposal?
