

# Integrated Impact Assessment (IIA)

Integrated impact assessment (IIA) form December 2019

[www.portsmouth.gov.uk](http://www.portsmouth.gov.uk)

The integrated impact assessment is a quick and easy screening process. It should:

- identify those policies, projects, services, functions or strategies that could impact positively or negatively on the following areas:
  - Communities and safety
  - Regeneration and culture
  - Environment and public space
  - Equality & - Diversity This can be found in Section A5

**Directorate:**

Regeneration

**Service, function:**

Transport Planning

**Title of policy, service, function, project or strategy (new or old) :**

On-Street Residential Chargepoint Scheme (ORCS) Phase 1

**Type of policy, service, function, project or strategy:**

- Existing
- New / proposed
- Changed

**What is the aim of your policy, service, function, project or strategy?**

Using funding from the Office of Zero Emission Vehicles (OZEV), formerly Office for Low Emission Vehicles (OLEV), PCC will deliver 36 chargepoints in locations where residential demand has been identified and off-street parking is not available. The aim of this scheme is to encourage the uptake of electric vehicles in Portsmouth where street layouts are a barrier to ownership. The scheme uses lamp-

column electricity to provide the charge for an overnight recharge of most standard electric vehicles. Where the lamp column is not adjacent to the kerbside, a satellite bollard is installed. The scheme offers both pay as you go and subscription payment options. Once electric vehicle ownership has been identified a dedicated bay is marked on street, vehicles must be plugged in, in order to not receive a PCN.

Has any consultation been undertaken for this proposal? What were the outcomes of the consultations? Has anything changed because of the consultation? Did this inform your proposal?

TRO consultation was undertaken on the 11th December 2018 until the 6th January 2019. All feedback was taken into account which meant the original 41 proposed electrical vehicle chargepoints were cut down to 36.
