Electric vehicle On-street Residential Chargepoint Scheme (ORCS): parking proposals under TRO 137/2021

Type of policy, service, function, project or strategy:

- Existing
- New / proposed
- Changed

What is the aim of your policy, service, function, project or strategy?

Using funding from the Office for Low Emissions Vehicles (OLEV) Portsmouth City Council will deliver circa 60 chargepoints in locations where residential demand has been identified and off-street parking is not available. The aim of this scheme is to encourage the uptake of electric vehicles in Portsmouth where street layouts are a barrier to ownership. The scheme utilises lamp column electricity in order to

provide the charge necessary for an overnight recharge of most standard electric vehicles, where the lamp column is not kerbside a satellite bollard is installed. The scheme offers both pay as you go and subscription payment options. Once electric vehicle ownership has been identified a dedicated bay is marked on street, vehicles must be plugged in in order to not receive a PCN. TRO 137 relates to both Highland Street, opposite No.23 and Waverley Grove, opposite No.2 which form a part of this scheme.

Has any consultation been undertaken for this proposal? What were the outcomes of the consultations? Has anything changed because of the consultation? Did this inform your proposal?
