

Integrated Impact Assessment (IIA)

Integrated impact assessment (IIA) form December 2019

www.portsmouth.gov.uk

The integrated impact assessment is a quick and easy screening process. It should:

- identify those policies, projects, services, functions or strategies that could impact positively or negatively on the following areas:
 - Communities and safety
 - Regeneration and culture
 - Environment and public space
 - Equality & - Diversity - This can be found in Section A5

Directorate:

Regeneration

Service, function:

Parking Service

Title of policy, service, function, project or strategy (new or old) :

TRO 35/2022 KE Pembroke Park proposed Residents' Parking Zone

Type of policy, service, function, project or strategy:

- Existing
- New / proposed
- Changed

What is the aim of your policy, service, function, project or strategy?

To make it easier for residents to find a parking space, and prevent long-term parking whereby non-residents leave their vehicles for long periods of time without moving them. To encourage people to think about how they travel to an area, when visiting, working or otherwise. To distribute the demand for

parking more fairly.

Has any consultation been undertaken for this proposal? What were the outcomes of the consultations? Has anything changed because of the consultation? Did this inform your proposal?

The informal survey on parking in the area was carried out 22 November 2021 - 13 December 2021 (232 properties), within an area identified on the Residents' Parking Programme of Consultation as "KE". Informal survey, formal consultation and feedback from residents informed the proposal to develop the KE parking zone. Statutory consultation subsequently took place via TRO 35/2022 between 25 March - 15 April 2022. The outcome indicates that the majority of people who responded support the proposed controlled zone and full details are within the published report.

A - Communities and safety

Yes

No

Is your policy/proposal relevant to the following questions?

A1-Crime - Will it make our city safer?

In thinking about this question:

- How will it reduce crime, disorder, ASB and the fear of crime?
- How will it prevent the misuse of drugs, alcohol and other substances?
- How will it protect and support young people at risk of harm?
- How will it discourage re-offending?

If you want more information contact Lisa.Wills@portsmouthcc.gov.uk or go to:

<https://www.portsmouth.gov.uk/ext/documents-external/cou-spp-plan-2018-20.pdf>

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

How will you measure/check the impact of your proposal?

A - Communities and safety

Yes

No

Is your policy/proposal relevant to the following questions?

A2-Housing - Will it provide good quality homes?

In thinking about this question:

- How will it increase good quality affordable housing, including social housing?
- How will it reduce the number of poor quality homes and accommodation?
- How will it produce well-insulated and sustainable buildings?
- How will it provide a mix of housing for different groups and needs?

If you want more information contact Daniel.Young@portsmouthcc.gov.uk or go to:

<https://www.portsmouth.gov.uk/ext/documents-external/psh-providing-affordable-housing-in-portsmouth-april-19.pdf>

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

How are you going to measure/check the impact of your proposal?

A - Communities and safety

Yes

No

Is your policy/proposal relevant to the following questions?

A3-Health - Will this help promote healthy, safe and independent living?

In thinking about this question:

- How will it improve physical and mental health?
- How will it improve quality of life?
- How will it encourage healthy lifestyle choices?
- How will it create healthy places? (Including workplaces)

If you want more information contact Dominique.Letouze@portsmouthcc.gov.uk or go to:

<https://www.portsmouth.gov.uk/ext/documents-external/cons-114.86-health-and-wellbeing-strategy-proof-2.pdf>

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

The reason for proposing parking zones is the demand from residents. Residents can find themselves driving round nearby streets for some time trying to find parking spaces that are taken up (often for long periods of time) by vehicles used by people who do not live there. This can cause frustration and anger, and affect what people do and when, particularly being mindful of not being able to park if using their vehicles later into the evening. Some residents, such as shift workers, arriving home at times when others are already parked may have little choice but to park some distance away from home and walk back. Others may feel that parking illegally on double yellow lines, for example, is their only option. Therefore, parking zones may improve mental health and quality of life for some residents. by controlling who can park and making Those who need regular visits by carers are less likely to find visits are delayed by the carer trying to find somewhere to park. By making it easier for those who are entitled to park the amount of time vehicles spend circling looking for space can be reduced and this can improve air quality.

Regarding healthy lifestyle choices, parking zones require people to pay for permits and this can encourage people to think about how they travel to an area, particularly for work. Understandably, people rarely think about the impact parking all day in residential areas may have until restrictions are proposed or implemented. They can be encouraged to consider alternative, potentially healthier, ways of getting to work that they may not have previously given thought to, such as getting a lift, car-sharing, walking, cycling, using public transport or a combination of these.

How are you going to measure/check the impact of your proposal?

The success or otherwise of RPZs is measured by feedback from people living, working and visiting an area. Subsequent adjustments can be proposed as and when necessary.

A - Communities and safety

Yes

No

Is your policy/proposal relevant to the following questions?

A4-Income deprivation and poverty-Will it consider income deprivation and reduce poverty?

In thinking about this question:

- How will it support those vulnerable to falling into poverty; e.g., single working age adults and lone parent households?
- How will it consider low-income communities, households and individuals?
- How will it support those unable to work?
- How will it support those with no educational qualifications?

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

Not all work places and educational institutions are on public transport routes and for some residents car ownership is a necessity. The price of the permits to residents for the first car is kept low and is presently £30 a year for the first car. The requirement to have the vehicle registered to the resident at their address reduces the opportunity for those who wish to borrow a car from friends or

How are you going to measure/check the impact of your proposal?

The success or otherwise of RPZs is measured by feedback from people living, working and visiting an area. Subsequent adjustments can be proposed as and when necessary.

A - Communities and safety

Yes

No

Is your policy/proposal relevant to the following questions?

A5-Equality & diversity - Will it have any positive/negative impacts on the protected characteristics?

In thinking about this question:

- How will it impact on the protected characteristics-Positive or negative impact (Protected characteristics under the Equality Act 2010, Age, disability, race/ethnicity, Sexual orientation, gender reassignment, sex, religion or belief, pregnancy and maternity, marriage and civil partnership,socio-economic)
- What mitigation has been put in place to lessen any impacts or barriers removed?
- How will it help promote equality for a specific protected characteristic?

If you want more information contact gina.perryman@portsmouthcc.gov.uk or go to:

<https://www.portsmouth.gov.uk/ext/documents-external/cmu-equality-strategy-2019-22-final.pdf>

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

The proposed residents' parking zone aims to benefit residents by enabling a turnover of parking spaces, making it easier to find a parking space when they need one, by preventing parking by non-residents 'blocking' spaces. The proposal may benefit those who report being uncomfortable with parking some distance from their homes and walking back (often in the dark) as availability of parking spaces should be improved. This concern is sometimes reported by young females and older people, but can include those within sexual orientation and gender reassignment groups. Parking restrictions such as double yellow lines on the corners of junctions aim to prevent vehicles blocking dropped kerb crossing points and parking across junctions,

improving visibility of pedestrians and approaching traffic.

Disabled residents and visitors would not be negatively impacted as blue badge holders are exempt from the restricted times and the parking zone may enable them to park closer to their destination (home, visiting friends, services, etc). With the Pembroke Park Zone the proposed restrictions apply 8am to 8pm which will mean that any visitors will need a permit and residents will have to pay for visitors parking. However residents who need regular care can obtain a "Carers Permit" and those involved in social care can obtain a city wide "Essential Users" permit.

How are you going to measure/check the impact of your proposal?

The success or otherwise of RPZs is measured by feedback from people living, working and visiting an area. Subsequent adjustments can be proposed as and when necessary.

B - Environment and climate change

Yes

No

Is your policy/proposal relevant to the following questions?

B1-Carbon emissions - Will it reduce carbon emissions?

In thinking about this question:

- How will it reduce greenhouse gas emissions?
- How will it provide renewable sources of energy?
- How will it reduce the need for motorised vehicle travel?
- How will it encourage and support residents to reduce carbon emissions?

If you want more information contact Tristan.thorn@portsmouthcc.gov.uk or go to:

<https://www.portsmouth.gov.uk/ext/documents-external/cmu-sustainability-strategy.pdf>

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

The proposed residents' parking zone may encourage residents and others to reduce carbon emissions. Parking restrictions can encourage people to consider alternative ways of traveling to an area, other than by single-occupancy private car. The greater availability of space can reduce the time vehicles spend driving up and down roads looking for parking spaces within very congested areas. In order for the parking provision in the area to operate more effectively and for more people, compromises are needed. Even small changes in travel behaviour by some can make a difference to an area in terms of parking, reduce traffic congestion throughout a wider area and potentially improve air quality. Higher costs for the second and, if applicable, third Resident permit per household primarily aim to encourage residents to think about how many vehicles are linked to their households, and to deter additional vehicles from being brought into the area. This is particularly relevant where there is effectively only space to park one vehicle across each property frontage. Third and subsequent Resident permits are only authorised if a parking zone has capacity.

The restrictions prevent/deter non residents using free parking to commute to work or for visitors to park in residential areas to avoid parking charges. This restriction encourages them to use different methods of travel.

There is the possibility that greater availability of space encourages some to keep a car or use it more but these disbenefits are outweighed by the other benefits.

How are you going to measure/check the impact of your proposal?

Introducing residents' parking zones may have a positive impact as described above, even though it is not their sole purpose. Whether or not carbon emissions are reduced within an area is likely to be due to a number of contributory factors and policies, and therefore identifying specifically how an RPZ has contributed is unlikely to be measurable.

B - Environment and climate change

Yes

No

Is your policy/proposal relevant to the following questions?

B2-Energy use - Will it reduce energy use?

In thinking about this question:

- How will it reduce water consumption?
- How will it reduce electricity consumption?
- How will it reduce gas consumption?
- How will it reduce the production of waste?

If you want more information contact Triston.thorn@portsmouthcc.gov.uk or go to:

<https://www.portsmouth.gov.uk/ext/documents-external/pln-portsmouth-plan-post-adoption.pdf>

<https://democracy.portsmouth.gov.uk/documents/s24685/Home%20Energy%20Appendix%201%20-%20Energy%20and%20water%20at%20home%20-%20Strategy%202019-25.pdf>

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

Finding parking space more easily and discouraging non residents from driving will reduce the pollutants produced by vehicles.

How are you going to measure/check the impact of your proposal?

We will monitor the availability of space as a greater availability of parking space in an RPZ indicates there are fewer vehicles parking in the area.

B - Environment and climate change

Yes

No

Is your policy/proposal relevant to the following questions?

B3 - Climate change mitigation and flooding-Will it proactively mitigate against a changing climate and flooding?

In thinking about this question:

- How will it minimise flood risk from both coastal and surface flooding in the future?
- How will it protect properties and buildings from flooding?
- How will it make local people aware of the risk from flooding?
- How will it mitigate for future changes in temperature and extreme weather events?

If you want more information contact Tristan.thorn@portsmouthcc.gov.uk or go to:

<https://www.portsmouth.gov.uk/ext/documents-external/env-surface-water-management-plan-2019.pdf>

<https://www.portsmouth.gov.uk/ext/documents-external/cou-flood-risk-management-plan.pdf>

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

How are you going to measure/check the impact of your proposal?

B - Environment and climate change

Yes

No

Is your policy/proposal relevant to the following questions?

B4-Natural environment-Will it ensure public spaces are greener, more sustainable and well-maintained?

In thinking about this question:

- How will it encourage biodiversity and protect habitats?
- How will it preserve natural sites?
- How will it conserve and enhance natural species?

If you want more information contact Daniel.Young@portsmouthcc.gov.uk or go to:

<https://www.portsmouth.gov.uk/ext/documents-external/pln-solent-recreation-mitigation-strategy-dec-17.pdf>

<https://www.portsmouth.gov.uk/ext/documents-external/pln-portsmouth-plan-post-adoption.pdf>

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

How are you going to measure/check the impact of your proposal?

B - Environment and climate change

Yes

No

Is your policy/proposal relevant to the following questions?

B5-Air quality - Will it improve air quality?

In thinking about this question:

- How will it reduce motor vehicle traffic congestion?
- How will it reduce emissions of key pollutants?
- How will it discourage the idling of motor vehicles?
- How will it reduce reliance on private car use?

If you want more information contact Hayley.Trower@portsmouthcc.gov.uk or go to:

<https://www.portsmouth.gov.uk/ext/documents-external/env-aq-air-quality-plan-outline-business-case.pdf>

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

As an alternative to the private car, local residents traveling independently from other parts of the city could make shared travel arrangements, use taxis and buses, as a number of visitors do from out of town. Restricting parking can encourage people to consider alternatives, as high volumes of people arriving by private car can result in a number of vehicles driving up and down roads looking for parking spaces within very congested areas, and waiting for spaces with engines idling. Residents have reported that vehicles are left over the long term by visitors and commuters to the Isle of Wight, an option for those drivers is to travel using public transport and this will have a positive impact upon air quality.

How are you going to measure/check the impact of your proposal?

Introducing residents' parking zones may have a positive impact as described above, although it is not their sole purpose. However, in conjunction with other Transport policies, restricting parking and eligibility for permits may reduce motor vehicle traffic congestion by encouraging people to consider alternative ways of travelling to an area, and may encourage residents to consider how many vehicles are linked to their households (permit costs etc). Where properties hold an HMO licence for 3-8 individual rooms, additional vehicles will be deterred from being brought into the area through the control of permits. This is not necessarily measurable.

B - Environment and climate change

Yes

No

Is your policy/proposal relevant to the following questions?

B6-Transport - Will it improve road safety and transport for the whole community?

In thinking about this question:

- How will it prioritise pedestrians, cyclists and public transport users over users of private vehicles?
- How will it allocate street space to ensure children and older people can walk and cycle safely in the area?
- How will it increase the proportion of journeys made using sustainable and active transport?
- How will it reduce the risk of traffic collisions, and near misses, with pedestrians and cyclists?

If you want more information contact Pam.Turton@portsmouthcc.gov.uk or go to:

<https://www.portsmouth.gov.uk/ext/travel/local-transport-plan-3>

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

Parking restrictions can encourage commuters and local employees to consider alternative ways of getting to work, as anyone driving to work by car has an impact on parking availability (including for customers), traffic congestion and air quality. Alternative modes of transport can include getting a lift, car-sharing, walking, cycling or using public transport. Restricting parking can encourage people to think about how they travel to an area, and the alternative options available.

How are you going to measure/check the impact of your proposal?

Feedback from residents and other road users is used to inform any subsequent proposals. Whilst residents rarely agree fully with a permit scheme, sometimes improvements can be identified afterwards and new proposals put forward for consultation.

B - Environment and climate change

Yes

No

Is your policy/proposal relevant to the following questions?

B7-Waste management - Will it increase recycling and reduce the production of waste?

In thinking about this question:

- How will it reduce household waste and consumption?
- How will it increase recycling?
- How will it reduce industrial and construction waste?
