Integrated impact assessment (IIA) form December 2019

www.portsmouth.gov.uk

The integrated impact assessment is a quick and easy screening process. It should:

- identify those policies, projects, services, functions or strategies that could impact positively or negatively on the following areas:
 - Communities and safety
 - Regeneration and culture
 - Environment and public space
 - Equality & - Diversity This can be found in Section A5

Directorate:

Regeneration

Service, function:

Transport Planning

Title of policy, service, function, project or strategy (new or old) :

Trial of allowing Private Hire Vehicles (PHV's) to access bus lanes in Portsmouth

Type of policy, service, function, project or strategy:

- Existing
- New / proposed
- Changed

What is the aim of your policy, service, function, project or strategy?

This trial will assess the impact of allowing Private Hire Vehicles (PHV's) to access bus lanes in the city, for a trial period. Five bus lanes will be included in the trial (Cavell Drive, Mile End Road, Markerway, Queens Street and Bishop Crispian way). Evidence gathered will provide information on

the impact this trial would have in terms of, potential delays and disruption, air quality and safety.

Has any consultation been undertaken for this proposal? What were the outcomes of the consultations? Has anything changed because of the consultation? Did this inform your proposal?

Initial consultation with key stakeholders has been carried out on the trial proposals and a working group has been established, including transport operators and other relevant groups, to assist in discussions on progressing with the details of the scheme. Should the trial be approved, consultation will continue with this working group. An Experimental TRO (ETRO) would be required for the trial period, to allow for the addition of PHV's to use the bus lanes. The ETRO would be in place for a minimum of 3 months, enabling consultation to take place concurrently with the scheme so that people can experience its effects first hand and provide feedback.

This measure may have a small impact in improving air pollution through helping to reduce traffic congestion at peak periods, by allowing PHV's to access bus lanes, taking them out of the queuing traffic on the main section of road. The impact on reducing air pollution is likely to be very small however.

How are you going to measure/check the impact of your proposal?

Air quality monitors shall be installed at each of the 5 no. trial locations. A minimum of one months' baseline data shall be collected to enable trial data to be compared and the impacts of the trial to quantified.
