

Integrated Impact Assessment (IIA)

Integrated impact assessment (IIA) form December 2019

www.portsmouth.gov.uk

The integrated impact assessment is a quick and easy screening process. It should:

- identify those policies, projects, services, functions or strategies that could impact positively or negatively on the following areas:
 - Communities and safety
 - Regeneration and culture
 - Environment and public space
 - Equality & - Diversity - This can be found in Section A5

Directorate:

Adult Social Care

Service, function:

Portsmouth Adult Social Care service provides support and advice to adults aged 18yrs and over who may need help in retaining their independence, perhaps as a result of a disability, long term condition or frailty associated with growing older. We work to assist those people to take control of how their care needs are met and help people secure the best possible care from the service of their choice. When full independence is no longer possible we will help people find the longer term living arrangements that best suits them.

Title of policy, service, function, project or strategy (new or old) :

Portsmouth Health & Care - Discharge to Assess Model.

Type of policy, service, function, project or strategy:

Existing

New / proposed

Changed

What is the aim of your policy, service, function, project or strategy?

There is a national directive to fully embed a 'Discharge to Assess' (D2A) and 'Home First' approach in local systems. This means that people are supported to safely leave hospital as soon as they are clinically able; that assessments of people's long-term care and support needs, happen outside of the acute trust and that for most people, all of this happens in their usual place of residence.

The vision for Portsmouth is to enable people to receive the right level and type of health and care services in their own home and community wherever possible, enabling them to remain well and independent for as long as possible by maximising their recovery, managing their long-term conditions, and avoiding unnecessary hospital admissions.

The key aims of the vision are to:

- Deliver the national ambition set out in the Hospital Discharge Guidance (ensuring a target for the number of people Medically Optimised For Discharge, (MOFD) for Portsmouth is no greater than the locally set target of 20)
- Achieve a sustainable rehabilitation and reablement offer (home and bed based), including D2A; and,
- Be able to flex to meet additional demands

A D2A guide produced by Department for Health, AADAS and NHS England identifies the benefits of a fully established D2A model and included:

- People's health outcomes improve as more people will be able to live at home for longer if services are designed for discharge to home to be the default
- People's length of stay in a hospital bed decreases due to longer-term assessments taking place in a more appropriate situation and

place. Evidence suggests this should reduce deconditioning and improve outcomes significantly for 10 days in hospital (acute or community) leads to the equivalent of 10 years ageing in the muscles of people over 80.

- Encourages NHS and Adult Social Care leaders to work together for the best outcomes and experiences for people through joint approaches to discharge to assess. This may include joint commissioning or funding.
- Improves system flow by enabling patients to access urgent care at the time they need it.
- Reduces duplication and unnecessary time spent by people in the wrong place.
- Enhances working relationships between the health, social care and housing sectors and increases development opportunities for their staff.
- Sharing responsibility, risks and skills across partners leads to innovative and creative solutions that deliver safe, effective care and support.

How are you going to measure/check the impact of your proposal?
 % of re-admissions (an increase is not always a negative indicator)
 Number of beds occupied by stranded adult patients defined as those with a LoS of 7 or more who are admitted via A+E

Discharge to usual place of residence from across the system

Discharge to usual place of residence on the day of their admission or the following day

Reduced hospital related falls

Reduced hospital acquired infections

Size of care packages (in both the short and long term)

Reduction in Delayed Transfers of Care (DToC) in all parts of the system including community beds

Patients and carers reporting a positive experience of the service- Proposed questions to include:

Q1 What was good about the experience?

Q2 What could be better?

Q3 What else would you like to tell us?
