Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

The proposal seeks to implement measures to reduce the number of highly polluting vehicles operating directly within the Clean Air Zone and, indirectly, across the City. The Clean Air Zone is situated in an area of high deprivation with known links to poor health outcomes that could be related to poor air quality. By reducing the number of highly polluting vehicles, we aim to improve local air quality and, by connection, population health.

There is a risk that traffic may re-route to other areas of the the City in order to avoid the CAZ. However, data has shown that in its first year of operation, there is little evidence to suggest this has happened to date.

How are you going to measure/check the impact of your proposal?

The CAZ monitors all vehicles entering the zone via ANPR cameras to understand compliance and vehicle types. We also collect data on the number of vehicles (and type of vehicles) to access grant funding to upgrade or retrofit.

All data is reported quarterly here <https://cleanerairportsmouth.co.uk/reporting/>

<https://www.portsmouth.gov.uk/ext/documents-external/env-aq-air-quality-plan-outline-business-case.pdf>

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?

The proposed closure of the Clean Air Fund may allow (subject to approval by JAQU) for the remaining funds to be spent on other air quality initiatives and projects which could contribute to improving air quality. Changes to the exemption system would mean that vehicle owners will need to obtain newer, less polluting, vehicles in order to avoid the Clean Air Zone charge.

How are you going to measure/check the impact of your proposal?

The success of a new project, using the remaining funding, would measure the impact of the proposal. A reduction in the number of non-compliant vehicles entering the CAZ would measure the impact of changes to the exemption system.

The CAZ monitors all vehicles entering the zone via ANPR cameras to understand compliance and vehicle types. We also collect data on the number of vehicles (and type of vehicles) to access grant funding to upgrade or retrofit.
