

Title of meeting: Health and Well Being Board

Date of meeting: 3rd September 2014

Subject: Joint Health and Wellbeing Strategy 2014 - 2017

Report by: Dr Janet Maxwell, Director of Public Health

Wards affected: All

Key decision: No

Full Council decision: No

1. Purpose

- 1.1. The purpose of this report is to seek the Health and Wellbeing Board's approval of the Joint Health and Wellbeing Strategy 2014-2017.**

2. Recommendations:

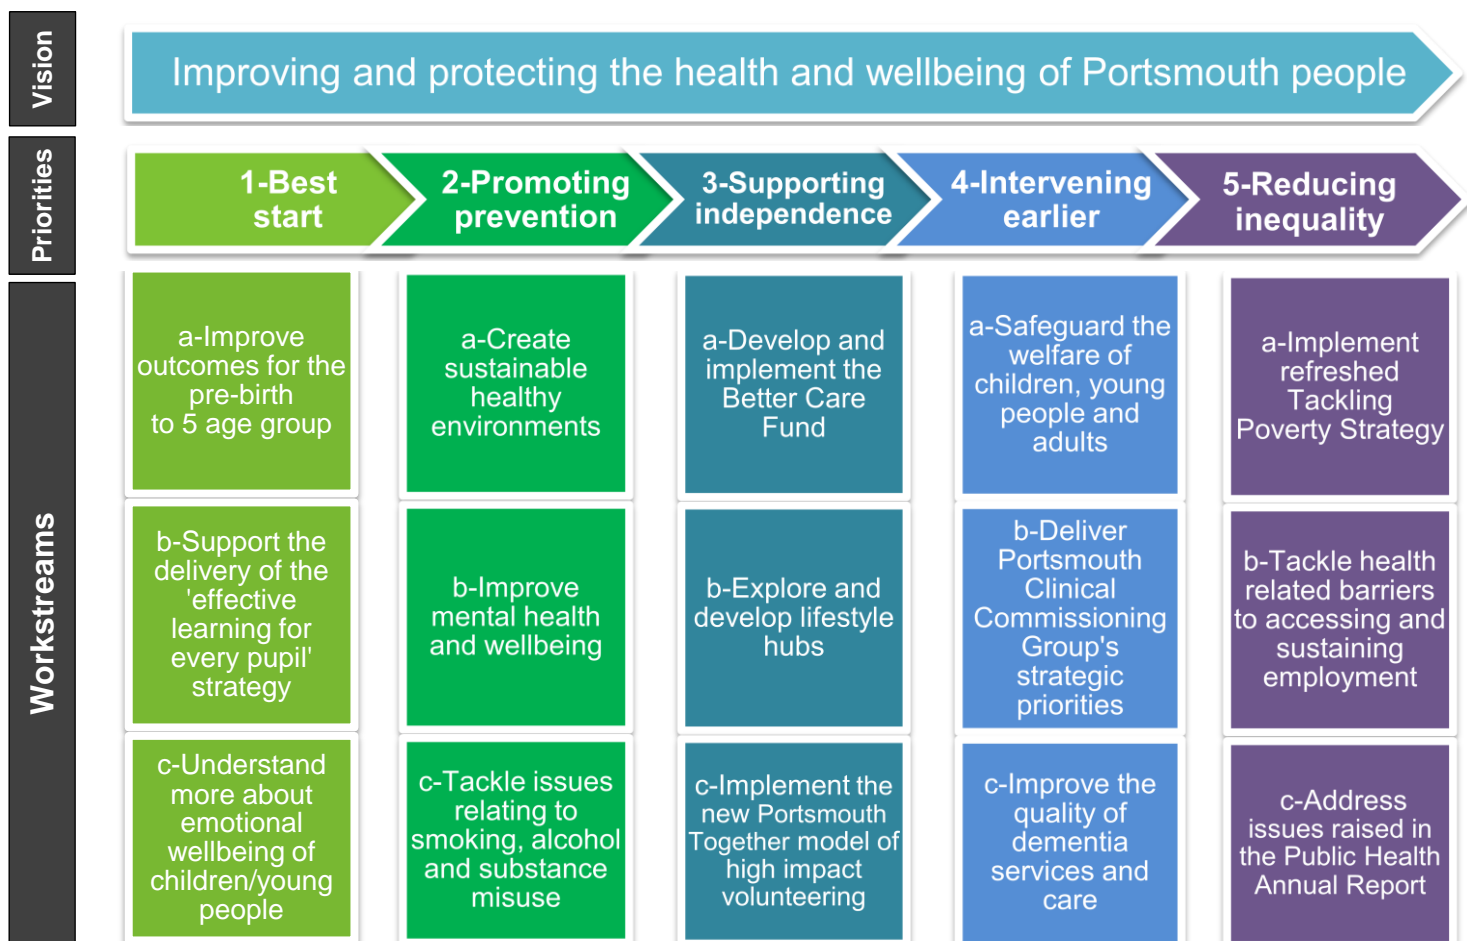

- 2.1 The Health and Wellbeing Board (HWB) are recommended to:
- 2.1.1 Approve the final version of the Joint Health and Wellbeing Strategy (JHWS) 2014 - 2017 for publication, as set out in the appendix to this report.
- 2.1.2 Agree that minor revisions can be made in future as plans for individual workstreams are developed, subject to agreement by the Chair and Vice-Chair.

3. Summary

- 3.1 Portsmouth's HWB has developed a JHWS covering the period 2014-2017, setting out how partners in Portsmouth will address the health and wellbeing priorities and challenges for Portsmouth which have been highlighted in the Joint Strategic Needs Assessment (JSNA).
- 3.2 The HWB has previously discussed and agreed the five priority themes that underpin the strategy and the priority workstreams that will deliver the improved outcomes being sought. This report seeks approval from the HWB for the final version of the JHWS for publication.

4. From needs analysis to priorities and workstreams

- 4.1 The [Joint Strategic Needs Assessment](#) presents the big picture of health and wellbeing need in the city, including detailed information (data, charts, maps, reports, evidence of effectiveness etc.) and the Annual Summary 2013. It identifies areas which would have most impact to improve the health and wellbeing of local people: tackling poverty; continuing to improve GCSE attainment; improving the health and wellbeing of males; and promoting healthy lifestyles for young people and adults (smoking, alcohol, healthy weight and mental wellbeing).
- 4.2 Preventing the need for costly services to 'cure' problems by intervening earlier has long been established in principle across a range of health and care services. Financial imperatives and legislative changes such as the Care Act 2014 make this need all the more pressing and we will continue to work with local communities to achieve the changes that will be essential. The Better Care Plan is just one example of the ways in which we will seek to do this.
- 4.3 Building on the points above, the Joint Health and Wellbeing Strategy 2014-2017 sets out local efforts to achieve this across five key priorities:
- a) giving children and young people the **best possible start in life**
 - b) **promoting prevention** by supporting individuals and communities to lead healthy and fulfilling lives
 - c) **supporting independence** through models of care that empower people and communities to support themselves
 - d) Delivering the right services of the right quality, at the right time and in the right setting, recognising that by **intervening earlier** we achieve better outcomes
 - e) Making Portsmouth a city where all people have the opportunity to have a healthy life including by **reducing inequalities**
- 4.5 Within each priority, the HWB have agreed a small number of workstreams that the board will actively support in order to achieve the board's vision. Each workstream has an identified lead and reporting arrangements, with clear expectations that being 'a priority' carries certain requirements including a plan covering things such as:
- The evidence as to why this is a priority issue locally
 - How we plan to tackle the issue
 - If we get this right what outcomes we will see
 - What the performance management arrangements are for this work.
- 4.6 The set of workstreams is as follows:

5. Delivering the Joint Health and Wellbeing Strategy 2014-17

- 5.1 Plans have been completed for each of the workstreams, although many of these are subject to further development including engagement with a wide range of stakeholders and approval through the relevant governance structures, as agreed by the HWB on 2nd July 2014.
- 5.2 The JHWS summarises the key points in relation to each workstream. As the plans for these develop there may need to be minor alterations to the JHWS to reflect this but the overall package of priorities and workstreams will not change without approval from the HWB.
- 5.3 The HWB will focus its attention on those areas within the JHWS where they can collectively add most value. Effort will not be duplicated: where a priority is clearly led by another part of the system the HWB will avoid imposing additional reporting requirements. Issues will be brought to the board where there is a clear need for the board to provide strategic leadership, and not simply to note progress that is already being reported elsewhere.
- 5.4 There has been widespread consultation on the needs analyses that underpin this strategy and the principles and priorities that underpin this strategy have been discussed and agreed at public meetings of the HWB. In relation to specific workstreams there will be more detailed consultation and engagement on any proposals where this has not already taken place. Discussions have

taken place with Healthwatch Portsmouth about how best to engage local people in constructive ways to further shape these plans as they develop.

6 Reasons for recommendations

- 6.1 This report builds on the approach previously agreed by the HWB and the work undertaken at their behest. It fulfils the board's statutory duty to develop and implement a strategy to address the health and wellbeing priorities and challenges for Portsmouth which have been highlighted in the JSNA.

7. Equality Impact Assessment (EIA)

- 7.1 A full EIA has been undertaken as part of the development of this strategy.

8. Head of Legal's comments

- 8.1 There are no other immediate legal implications arising from this report

9. Head of Finance's comments

- 9.1 There are no direct financial implications contained within the recommendations of this report. However, whilst it is difficult to quantify, any improvement in the health and wellbeing of our residents has the potential to yield financial benefits to the City Council and other public sector partners through reduced demand for services and efficiency gains where NHS, City Council and other services are delivered in a more co-ordinated way.
