

Form name	Integrated Impact Assessment
Reference	IA540056862
Date	17/08/2023

Policy details

Request date	17/08/2023 13:19
Directorate	PCC Housing, Neighbourhood and Building Services
Service	Waste Management - waste collection
Title of policy, service, function	Local Authority Housing Communal Bin Store Improvement Project
Type of policy, service, function	Changed
What is the aim of your policy, service, function, project or strategy?	The Environment Act 2021 legislates a consistent set of materials for recycling. It is expected this is required to be implemented across the city from 2025 and this project is to prepare our communal housing properties and improve bin stores & provision for residents
Has any consultation been undertaken for this proposal?	yes
What were the outcomes of the consultations?	Consultation and engagement work with residents has taken place and further consultation and engagement is planned as each housing estate area. A trial of the improvements and changes took place.
Has anything changed because of the consultation?	no
Did this inform your proposal?	no

Equality & diversity - will it have any positive/negative impacts on the protected characteristics?

<p>With the above in mind and following data analysis, who is the policy, service, function, project or strategy going to benefit or have a detrimental effect on and how?</p>	<p>It will not impact on those characteristics as we will look at making reasonable adjustments within the service for the protected characteristic of disability and age</p>
<p>Will any of those groups be affected in a different way to others because of your policy, project, service, function, or strategy?</p>	<p>There is a potential that people within the groups disability and age will have to travel further to dispose of their waste and recycling however as above, reasonable adjustments will be made on a case by case basis</p>
<p>If you are directly or indirectly discriminating, how are you going to mitigate the negative impact?</p>	<p>There is the potential of indirectly discriminating against those that have difficulties getting their waste to the bins or bin stores. This will be mitigated by working with the housing and estates teams to identify blocks where we need to make reasonable adjustments for example keeping chute rooms open or providing additional containers that are accessible for those groups</p>
<p>Who have you consulted with or are planning to consult with and what was/will be your consultation methodology?</p>	<p>We have engaged with the residents consortium and prior to any works starting we will be running events/door knocking properties where the works are significant eg. change in bin store locations</p>
<p>How are you going to review the policy, service, project or strategy, how often and who will be responsible?</p>	<p>The project will be reviewed annually as standard however there maybe instances where we review if an issue or problem is highlighted to us. Head of Waste Services will be responsible for the review</p>

Crime - Will it make our city safer?

<p>Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?</p>	<p>It may reduce anti social behaviour associated with bin stores such as fly tipping and arson</p>
<p>How are you going to measure/check the impact of your proposal?</p>	<p>Existing data showing amount of demand associated with bins and bin stores at PCC housing blocks. We would expect the number of fly-tipping and arson events to decrease by introducing this</p>

Housing - will it provide good quality homes?

<p>This section is not applicable to my policy</p>	<p><input checked="" type="checkbox"/></p>
---	--

Health - will this help promote healthy, safe and independent living?

<p>This section is not applicable to my policy</p>	<p><input checked="" type="checkbox"/></p>
---	--

Income deprivation and poverty - will it consider income deprivation and reduce poverty?

<p>This section is not applicable to my policy</p>	<p><input checked="" type="checkbox"/></p>
---	--

Carbon emissions - will it reduce carbon emissions?

<p>Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?</p>	<p>The design aims to ensure there is enough capacity within the store area for once a week collections - currently majority of communal properties are collected multiple time a week for refuse so this will aim to reduce vehicle movements around the City</p>
<p>How are you going to measure/check the impact of your proposal?</p>	<p>We have data on distance travelled by each vehicle and CO2 equivalent associated that can be measured</p>

Energy use - will it reduce energy use?

<p>Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?</p>	<p>It won't reduce the overall amount of waste produced by a property but aims to promote correct waste management to increase recycling</p>
<p>How are you going to measure/check the impact of your proposal?</p>	<p>Data on tonnage of waste in refuse and recycling collected</p>

Climate change mitigation and flooding - will it proactively mitigate against a changing climate and flooding?

<p>This section is not applicable to my policy</p>	<p><input checked="" type="checkbox"/></p>
---	--

Natural environment - will it ensure public spaces are greener, more sustainable and well-maintained?

<p>This section is not applicable to my policy</p>	<p><input checked="" type="checkbox"/></p>
---	--

Air quality - will it improve air quality?

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?	The design aims to ensure there is enough capacity within the store area for once a week collections - currently majority of communal properties are collected multiple time a week for refuse so this will aim to reduce vehicle movements around the City
How are you going to measure/check the impact of your proposal?	We have data on distance travelled by each vehicle so hope to have an overall reduced vehicle travel distance once this is implemented

Transport - will it make transport more sustainable and safer for the whole community?

This section is not applicable to my policy	<input checked="" type="checkbox"/>
--	-------------------------------------

Waste management - will it increase recycling and reduce the production of waste?

Please expand on the impact your policy/proposal will have, and how you propose to mitigate any negative impacts?	It won't reduce the overall amount of waste produced by a property but aims to promote correct waste management to increase recycling. It will offer more recycling streams to encourage recycling
How are you going to measure/check the impact of your proposal?	Refuse and recycling tonnage data and waste composition data

Culture and heritage - will it promote, protect and enhance our culture and heritage?

This section is not applicable to my policy	<input checked="" type="checkbox"/>
---	-------------------------------------

Employment and opportunities - will it promote the development of a skilled workforce?

This section is not applicable to my policy	<input checked="" type="checkbox"/>
---	-------------------------------------

Economy - will it encourage businesses to invest in the city, support sustainable growth and regeneration?

This section is not applicable to my policy	<input checked="" type="checkbox"/>
---	-------------------------------------

Social value

This section is not applicable to my policy	<input checked="" type="checkbox"/>
---	-------------------------------------

Involvement

Who was involved in the Integrated impact assessment?	Ashleigh Moore, Rebecca Adams
Name of the person completing this form	Ashleigh Moore
Date of completion	2023-08-17
