

APPENDIX 2 - Bathing water classification signage

Symbols for informing advice against bathing

Symbols for informing on bathing water classification

Use the [bathing water quality widget designer](#) tool to show up-to-date bathing water quality information on your website.

Display advice against bathing

If a bathing water is classified as 'poor' you must display the 'advice against bathing' symbol.

You must also display information on the causes of pollution and what action is being taken to clean it up. This information will be shown on the sign template.
