

# Appendix 5- Revisions to WSMP and Risk Assessments

## Water Safety Management Plan

### **Section 8.4 - Impact Injury & Unconscious Casualty (page 16)**

- Addition of 'risk of contact with moving vessel' as a cause of injury/casualty

### **Section 8.5 - Infection from polluted water (page 16)**

- Adjustment to specific wording around leptospira/leptospirosis

### **Section 9.1 Education (page 17)**

- Addition of narrative clarifying PCC approach to water safety education and the support of expert water safety bodies to deliver the educational piece.

## Appendix 1 - Coastal Site Risk Assessments

### **Zone 2b - Pyramids to Coffee Cup (page 17 & 18)**

- Adjustment to history of incidents section from 'unknown' to reflect that the RNLI lifeguard kiosks record all incidents within working hours for the months of July and August
- Adjustment to significant hazards section to include jumping from the pier and to reference the strong tidal currents around the Southsea Castle rock revetment that have been known to catch out paddleboarders
- Adjustment to description of zone east of pier to include reference to the inshore leisure vessel passage through the submerged barrier opposite Canoe Lake which can introduce moving vessels as a risk to people in the water
- Addition of Lifeguarding to Management section to reflect presence of contracted lifeguard service in July and August

### **Zone 3 - Coffee Cup to Eastney (page 23)**

- Adjustment to history of incidents section from 'unknown' to reflect that the RNLI lifeguard kiosks record all incidents within working hours for the months of July and August
- Addition of Lifeguarding to Management section to reflect presence of contracted lifeguard service in July and August

### **Zone 5 - Milton Common (page 29)**

- Addition of wording referencing potential for submerged hazardous objects due to being former landfill site

### **Zone 12 - The Hard (page 48)**

- Additional paragraph to Demographic & Activities highlighting use of small shingle beach for boat storage and some ASB such as bonfires and gatherings

## Appendix 2- Inland Water Risk Assessments

Addition of two newly identified inland water bodies that require risk assessing at Tamworth Park & Baffins Dipping Pond (pages 17 & 19).

No identified issues that need addressing and areas observed to be managed safely.
