

Local Authority Housing Anti-Social Behaviour Policy Appendix B - Risk Assessment Matrix

The Anti Social Behaviour (ASB) risk assessment helps to assess the vulnerability of the complaint at the earliest opportunity following a report of ASB.

Outcomes of the assessment should be used when making decisions about what action to take and assessing the level of risk associated with the incident and or ASB case.

The form should be completed when each ASB case is opened and periodically when reviewing ASB cases to ensure the needs of the Victim are taken into consideration.

The Risk assessment is not a check list and should not be treated as such. It is an additional tool to support dynamic decision making.
